

# Emmet in React and React Native

Filter by Topic

## React JS

React JS

### Code Snippet:

Copy Code

```
// Basic Emmet Usage
// Emmet abbreviations can be used in your JSX files (.jsx or .js).
//Here are a few common examples:

//Creating a Simple React Component

//Abbreviation:
rafce

//Expansion:
import React from 'react';

const ComponentName = () => {
  return (
    <div>

    </div>
  );
};

export default ComponentName;
```

```
//Creating a Function Component with Props
//Abbreviations
rafcp
```

```
//Expansions
```

```
import React from 'react';
```

```
const ComponentName = (props) => {
  return (
    <div>

    </div>
  );
};
```

```
export default ComponentName;
```

```
//Creating a Class Component
```

```
//Abbreviation:
```

```
rafcc
```

```
//Expansion:
```

```
import React, { Component } from 'react';
```

```
class ComponentName extends Component {
  render() {
    return (
      <div>

      </div>
    );
  }
}
```

```
export default ComponentName;
```

```
//Creating a Functional Component with //useState Hook
```

```
//Abbreviation:
```

```
rafcc
```

```
//Expansion:
```

```
import React, { useState } from 'react';

const ComponentName = () => {
  const [state, setState] = useState(initialState);

  return (
    <div>

    </div>
  );
};

export default ComponentName;
```

## React Native

React Native

### Code Snippet:

Copy Code

```
// Example of Creating a React Native Component
// Creating a React Native Component
// Abbreviation:
rnfe
```

```
// Expansion:
import React from 'react';
import { View, Text } from 'react-native';
```

```
const ComponentName = () => {
  return (
    <View>
      <Text>Hello World</Text>
    </View>
  );
};
```

```
export default ComponentName;
```

```
// Creating a Styled Component
// Abbreviation:
```

rnfes

// Expansion:

```
import React from 'react';
```

```
import { View, Text, StyleSheet } from 'react-native';
```

```
const ComponentName = () => {
```

```
  return (
```

```
    <View style={styles.container}>
```

```
      <Text style={styles.text}>Hello Styled World</Text>
```

```
    </View>
```

```
  );
```

```
};
```

```
const styles = StyleSheet.create({
```

```
  container: {
```

```
    flex: 1,
```

```
    justifyContent: 'center',
```

```
    alignItems: 'center',
```

```
  },
```

```
  text: {
```

```
    fontSize: 20,
```

```
  },
```

```
});
```

```
export default ComponentName;
```
